

KPI And Report Rationale

Why each KPI was used, what it signals, and what action it drives.

domain	kpi	current_value_or_status	definition	why_used	what_it_signals	business_action	report_placement
Executive	Net Revenue	R3,994,247,413	Sum of transaction net revenue after discounts	Top line, dedicated to the first board-level signal of growth	Whether the business is growing, market demand, production issues	Investigate by channel and product line	Executive Overview, Monthly Peaks
Executive	Gross Margin	R1,938,497,252	Revenue less modeled product cost and fulfillment	Revenue minus cost margin can destroy value; margin is the lifeblood	Whether the business is growing growth too expensive	Prioritize selling profitable bundles, pricing review	Executive Overview, Category KPI, Product
Executive	Gross Margin Rate	48.5%	Gross margin divided by net revenue.	Normalizes margin so categories and channels	Margin compressed, discount overuse, poor channel	Tighten discount on low-margin, higher-margin products	Executive Overview, Category KPI, Product
Customer	Average Order Value	R2,756	Net revenue divided by distinct orders.	AOV shows basket depth and upsell effectiveness	Whether customers are buying single items or building baskets	Recommendations, threshold offers	Marketing Research, Analytics, Demographics
Operations	Return Rate	4.9%	Return amount divided by net revenue.	Returns are direct margin leakage and a customer experience issue	Clear PDP content, damaged products	Improve size guides, PDP quality, issues post-purchase	Marketing Research, Analytics, Customer
Merchandising	Hero Category Revenue	Apparel (R1,759,430,045)	Highest revenue category in the modeled catalog	Shows which category deserves executive attention	Where customers are concentrated and where they are not	Stock up on hot items, SEO hubs, develop new categories	Category KPI, SEO, Merchandise
Marketing	Channel ROAS	Direct (100.0x ROAS)	Revenue divided by estimated channel spend	ROAS controls media efficiency and prevents overspend	High quality leads are efficient versus expensive	Optimize ROAS by channel; constrain low-ROAS spend	Category KPI, Analytics, Intelligence
Marketing	A/B Test Uplift	Included in experiment sheets	Difference in conversion, AOV or margin between variants	Testing and adaptation from evidence before scaling	Whether a new idea is worth the budget or landing page	Roll back or iterate on less effective tests	Marketing Research, Growth Marketing Report
ML	Return-Risk AUC	0.589	Area under ROC curve for the return-risk classification	AUC measures ranking quality across thresholds	Whether the model can separate risky orders from safe	Use model to identify high-risk orders	Marketing Research, Analytics, Customer
ML	Return-Risk Recall	0.718	Share of actual return-risk cases captured by the model	For operations, missing risky returns is usually worse than returning good orders	Whether the model can find high-risk orders early	Route high-risk cohorts to PDP fixes, customer outreach	Marketing Research, Analytics, Customer
Finance	VAT Reconciliation	Included in finance pack	Compares ecommerce sales/refunds/VAT to VAT returns	Finance controls, not only VAT compliance	Discrepancies, settlement timing gaps, VAT errors	Exception reporting, reconciliation	Accounting, Finance, SAP Mapping
Governance	Row Count Control	2,000,000	Source and target row counts for uploaded files	Simple but powerful control that catches errors	Pipeline duplication, accidental truncation, duplicate rows	Check row counts before loading	Analytics, Data Governance
Governance	Source Lineage	Documented	Maps website, generated data, Fabric paths, Power BI models, reports and tables	Prove a KPI can be traced back to a reliable source	Whether a KPI can be traced back to a reliable source	Substantiate to the data source	Analytics, Data Governance
Platform	Fabric Capacity State	Paused after handover	Azure Fabric F2 capacity running or paused	Cloud cost control is part of senior BI ownership	Whether proof infrastructure is still consuming	Resume only for refresh/demo; suspend after demo	Cloud, Handover, Final Completion Report

Report Catalog

report	audience	primary_kpis	why_this_report_exists	how_to_use_it
Executive Overview	CEO, CFO, Head of Ecommerce	Revenue, margin, AOV, return rate, monthly trend, hero categories	Give the quickest health check of scale, profitability and trading performance	Use first in interviews and board-style walkthroughs.
AI Commerce Command Center	Executive team, BI Ops, Marketing, Merchandising	Model predictions, agents, anomalies, category roles, channels	Shows efficiency from passive reporting to intelligent operating rhythm	Use to explain how AI agents can turn BI signals into actions.
ML Return-Risk Monitoring	COO, Customer Experience, BI/ML	AUC, recall, risk bands, risky categories/products	Demonstrates applied ML and shows where return leakage can be attacked	Use as a position model as a watchlist, not a perfect oracle.
Marketing Growth Report	CMO, Performance Marketing	ROAS, A/B uplift, SEO roadmap, competitor comparison	Communicates revenue growth and Azure-credit discipline.	Use to justify scaling only after tests prove lift.
Accounting Governance Pack	CFO, Finance Manager, Auditor	VAT, refunds, journal entries, SAP mapping, exceptions	Shows accounting-grade reconciliation, not just analytics storytelling	Use to prove finance, SAP BW/SAP B1 and audit readiness.
ERD And Fabric Deployment Report	Data Architect, BI Lead, Hiring Manager	Star schema, table grain, relationships, OneLake paths	Explains how the data model is built and why it can scale.	Use to demonstrate senior architecture thinking.
Power BI Screenshot Pack	Hiring Manager, Portfolio Reviewer	Executive, ML and marketing proof screenshots	Provides visual evidence even if the live tenant is not open.	Use as quick proof in applications, interviews and email follow-ups.
Final Executive Dossier	All stakeholders	Concise end-to-end story, screenshots, KPIs, handover	Final version that consolidates the whole project into one polished document	Use as the main portfolio attachment.
